

Question and Answers for Solicitation Number S-IN650-16-Q-0136 for Purchase of New Delhi Ambulance

Question: Please provide details of the radio system. Brand, model, the features needed (like encryption, etc.).

Answer: American Embassy will install its own Radio System

Question: The specs do not mention an air conditioner for patient compartment. Is this part of the requirement?

Answer: AC would be nice in the patient compartment

Question: The specs require a patient compartment heater. Do you need anything like a Webasto dry-type roof-mounted heater, or is the heating function of a rear A/C adequate?

Answer: heat would be nice in the patient compartment; please advise additional cost of Webasto.

Question: There are no details for the light bar and other exterior lights. Can you provide details such as desired color(s) and type (LED, Strobe, etc?)

Answer: Blue Light Bar as shown in the attachment

Question: Multiple seating layouts are available for ambulances. Can you provide more detail on number of patients and number of medical attendants? Attached are three examples.

Answer: The 1 + 3 seats would be best

Question: Please clarify the power supply requirements. As there will be medical equipment on the vehicle even though there is no request we will add a battery recharger, inverter and power outlets. We found that the voltage is 230V in India. Should we offer 230V or does the customer request another voltage? This will affect the medical equipment selected and is important to know.

Answer: We require multiple power supply 110V and 230V for medical equipment and continuous electrical supply

Question: We are checking for the import and export of the medicines. There may be restrictions. Is there any possibility to source them locally in India?

Answer: American Embassy will have its own medicines in the Ambulance

Question: Will American embassy provide the base vehicle for ambulance or the bidder will provide the base vehicle for the ambulance

Answer: Bidder will provide vehicle with medical equipment as given in the solicitation document

Question: Is there any standard or certification required for medical equipments. For example EN 1789, 10 G crash test for ambulance

Answer: Yes
